Joris Harnetiaux - Senior Frontend Engineer

33 years old - 11 years of experience

Profile

Senior Frontend Engineer with solid experience within a multidisciplinary team of 8 people. Passionate about creating impactful user experiences, I prioritize a product-oriented approach, always striving to blend technology with user needs. My technical skills enable me to contribute effectively to projects, but it's the opportunity to transform ideas into concrete solutions that motivates me the most. I am committed to adding real value at every stage of development by collaborating closely with my colleagues to design intuitive and high-performing interfaces.

Work experiences

Senior Frontend Engineer

📅 5 years and 4 months (Jul 2019 - Current Position)

Ricardo
📍 Valbonne, France

Contributing to the development and optimization of the Ricardo platform, the leader in second-hand marketplaces in Switzerland. Working on key features in post-sale management, item listing and buyer experience. I leverage modern technologies, ensuring seamless communication with backend services. I collaborate closely with the product and design to align technical needs with business objectives. Additionally, I have been involved in overhauling internal processes to improve team efficiency.

Key achievements

Led various Frontend topics

Payment provider integration (Stripe), Swiss Post integration, improve

> buying/selling experience, dispute management

Frontend: ReactJs, NextJs, Typescript, Material UI 5

Backend : NodeJs, Express

> Facilitated and actively participated to concept & ideation workshops

> Successfully migrated from Material UI 4 to Material UI 5

> Improved Agile processes within the team

Scrum Master Senior Full Stack Engineer

📅 4 years and 2 months (May 2015 - Jul 2019)

CROSSKNOWLEDGE
A Wiley Brand
📍 Valbonne, France
